

GEOLOGIC MAP OF THE BAKER QUADRANGLE, IDAHO

compiled by
Victoria E. Mitchell and Earl H. Bennett

1979

assisted by
Gail S. Hustedde
Julie A. Copeland

1960 magnetic declination from true north varies from 19° 30' easterly for the center of the west edge to 19° 00' easterly for the center of the east edge.

Index to 1:250,000-scale maps by USGS.

The Geological Map Series (2° Quadrangle) by the Idaho Department of Lands consists of geological compilations from the best sources available. These compilations are not intended to be finished geological maps, but they should prove useful until such maps are published. Stratigraphic correlations, contacts, and other contouring and mapping interpretation are the responsibility of the compilers. Some information has been modified using aerial photography. This project was partially funded through a contract with the U.S. Department of Energy (Bendix Corporation, prime contractor).

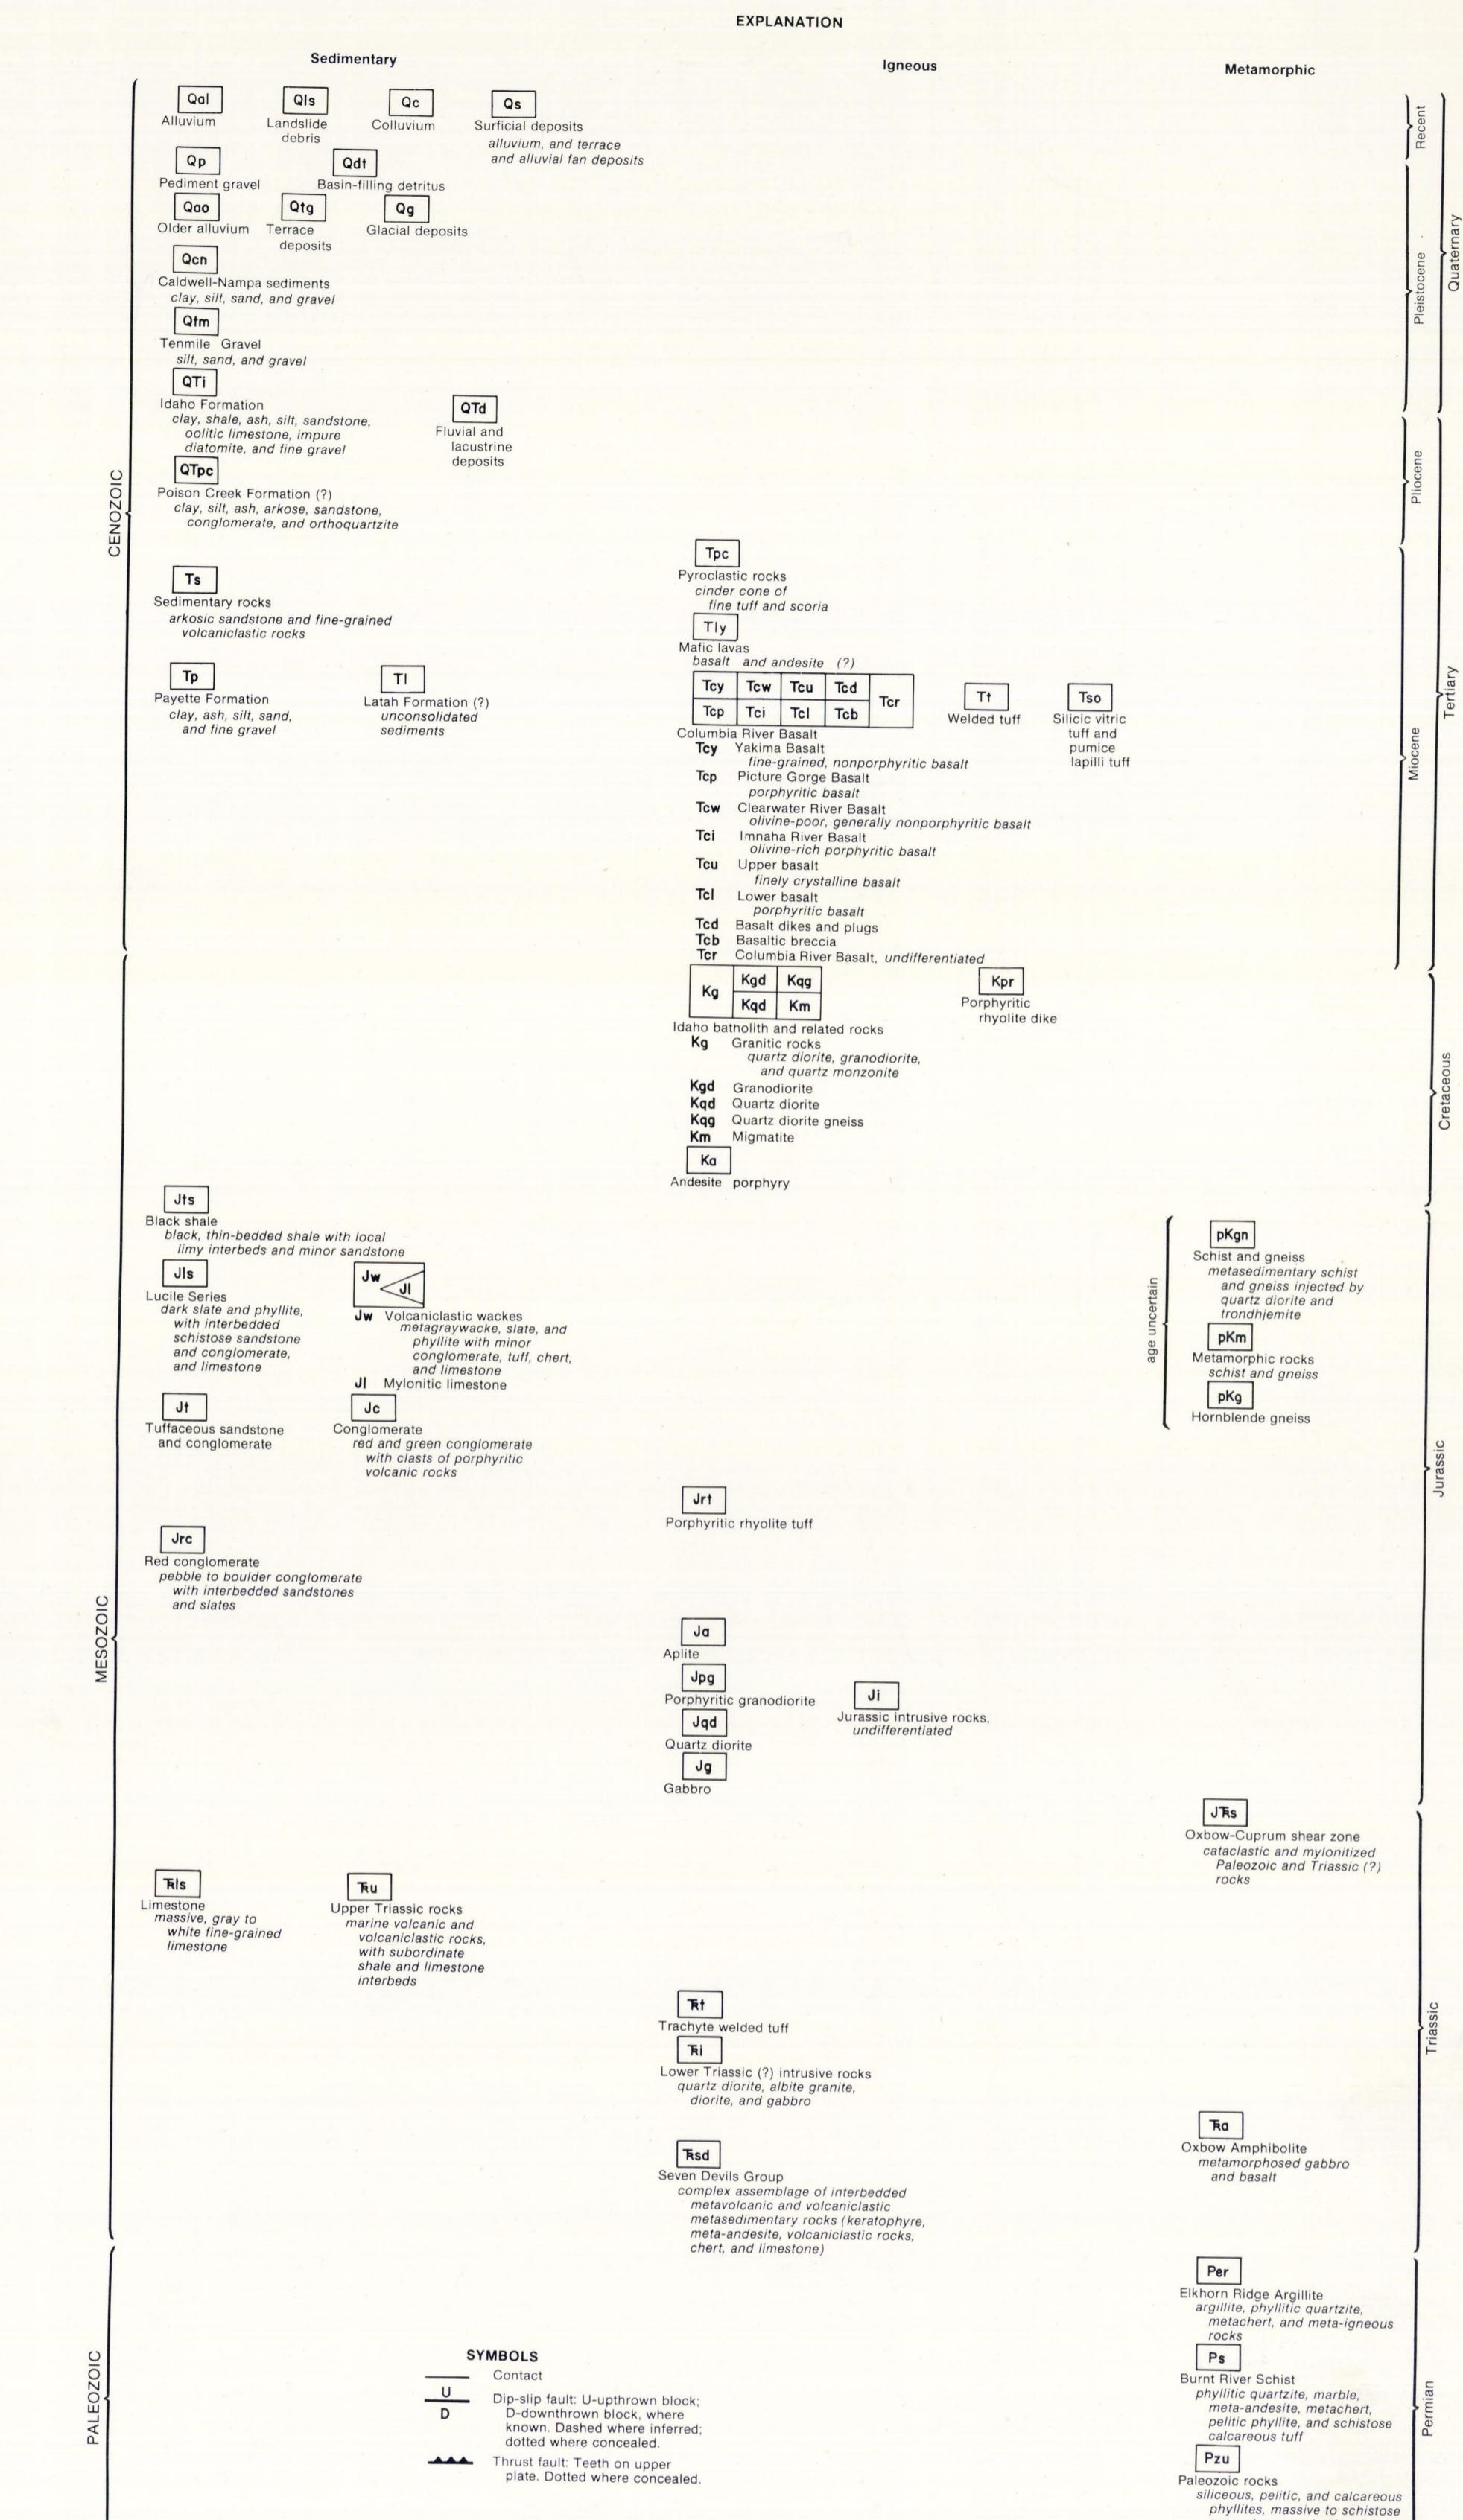

Printed by LithoCraft, Inc.—Boise

SCALE 1:250,000
CONTOUR INTERVAL 200 FEET
5 0 5 10 15 20 25 30 Statute Miles
5 0 5 10 15 20 25 30 Kilometers

Base by U. S. Geological Survey, 1974.
