1. Name of Prospect Consolidated Silver-Lead Mine District Coeur d'Alene  
 Location Paula Mining District Sec. 13 & 14 Twp. 50 N. R. 5 E. Co. Shoshone  
13 & 19 6 E.  
 Samples submitted by R. A. Duttonschon (through U. S. Bureau of Mines, Spokane)  
 Address Durbin, Idaho  
 Owner of claim, mine or land Consolidated Silver-Lead Mining Company  
 Address Durbin, Idaho  
 Examined by R. B. Stanley, John Taber Dates incl. April 21, 1950  
 No. of samples collected None Type sample --  
 List of available maps Composite Geologic Plan of Consolidated Silver-Lead Mine, U. S. Bureau of Mines List of previous reports None on this property

2. Description of Examination - (Amount detail radiometric traversing, detail geology, mapping, etc.)

Radiometric traversing - 3,000 feet

Sketch Workings  
(With Sample Locations)

Geology -

- 3. Type of Deposit -  
Partly mineralized shear zone (occasional pods of galena)
- 4. Geologic Environment - (Wall rock, etc.)  
Pritchard formation, Belt series
- 5. Mineralogic Associations -  
Galena, pyrite, quartz, calcite

6. History of Prospect -

  
 Has been prospected chiefly because it is on northwesterly shear zone not far from where a similar zone contains good ore which has been mined for years at the Jack Wadto mine.
