

Questions (rate 1 = strongly disagree; 2 = disagree; 3 = neutral; 4 = agree; 5 = Strongly Agree)

1. The Field Trip was useful and a good learning experience.					
1	2	3	4	5 Mean	
			3	10	4.77
2. The Rapid Visual Assessment exercise was useful and a good learning experience.					
1	2	3	4	5 Mean	
		2	3	8	4.46
3. The Minerals and Rocks short course was useful and a good learning experience					
1	2	3	4	5 Mean	
			4	9	4.69
4. The Lightning Creek hazards activity was useful and a good learning experience					
1	2	3	4	5 Mean	
			6	7	4.54
5. The Lightning Creek lake sediment activity was useful and a good learning experience					
1	2	3	4	5 Mean	
			4	9	4.69
6. The Lightning Creek rock collection activity was useful and a good learning experience					
1	2	3	4	5 Mean	
		2	4	7	4.38
7. I found the project helpful in developing material relevant to my own classroom needs.					
1	2	3	4	5 Mean	
	1	1	5	6	4.23

Written comments

1. Well worth the trip.
2. I liked the format of the class at Stanley much better.
I also feel that, although people were "having fun," we should stick to a schedule (i.e. "we're at this spot for 20 min, so be back at the vans by then, please) and if we ARE running late, we should condense rest of day.
3. Everything was great. When mailing out info to prepare people, there could be more info as to what to expect, or what the final project would be.
4. Everything to like, nothing to dislike--well maybe the storm at the BBQ.
Thank you for all your hard work. Keep a space for N. Idaho teachers next year!
5. It was a good class. I was able to learn a lot even though I don't know as much as others.
6. Good info, good ideas. Great week as usual.
7. Most important to me were the trips to the different sites. It made abstract concepts a little more visual and understandable.
8. Thank you so much for providing this wonderful experience! I am awed by the expertise of the instructors. It was an honor to work with them. I will assist IESTA in developing further means of publicizing field classes. Some post-publicity, such as press releases or pictures of participants, would also help. A small thing, but...please be specific about the kinds of materials/supplies we need for the field trips and lesson development and project presentation. I wish I had had my computer!
Thanks for your support.
9. The rapid visual assessment was too long. I heard several comments about people were bored with it. I felt that it was worthwhile, but it did get a little monotonous.
10. Could not fully participate in Lightning Creek lake sediment activity (because of physical limitations)
