Disclaimer: The Idaho Geological Survey does not guarantee Oil and Gas data to be free of errors nor assume liability for interpretations made from these data, or decisions based thereon.

The KMZ file was created in ArcGIS Pro 3.1.1 using an abbreviated IDOilGas table from the Oil and Gas database version 1.2023. A number of fields were removed to make the abbreviated table for the purpose of improving viewability and usability of the KMZ pop-ups.

The KMZ has been tested in Google Earth on a Windows 10 platform and on LG G5 Android 6.0.1 with Google Earth application.
